

*Getting exam ready.*

**How to prepare for your GCSE science  
examinations.**

Take **organised, neat** and **detailed** notes in class.

Make, and regularly refer to, a list of **key scientific words** for each topic.

**Listen** to your teacher!

**Push** yourself in lessons

**Plan** your answer to short essay style questions.

Mindmap

Eat a **good, balanced diet**.

Sugary foods will make it difficult for you to concentrate.

Start your revision **early** in the academic year.

Ask family to **test** you on long car journeys.

Schedule in time for your **hobbies**.

Complete lots of **past papers**.

Make a revision **timetable**

Get plenty of **sleep**

... and stick to it!

**Switch off** all distractions

Always **mark** and **correct** your completed past papers.

Never leave a lesson without **understanding** the lesson content.

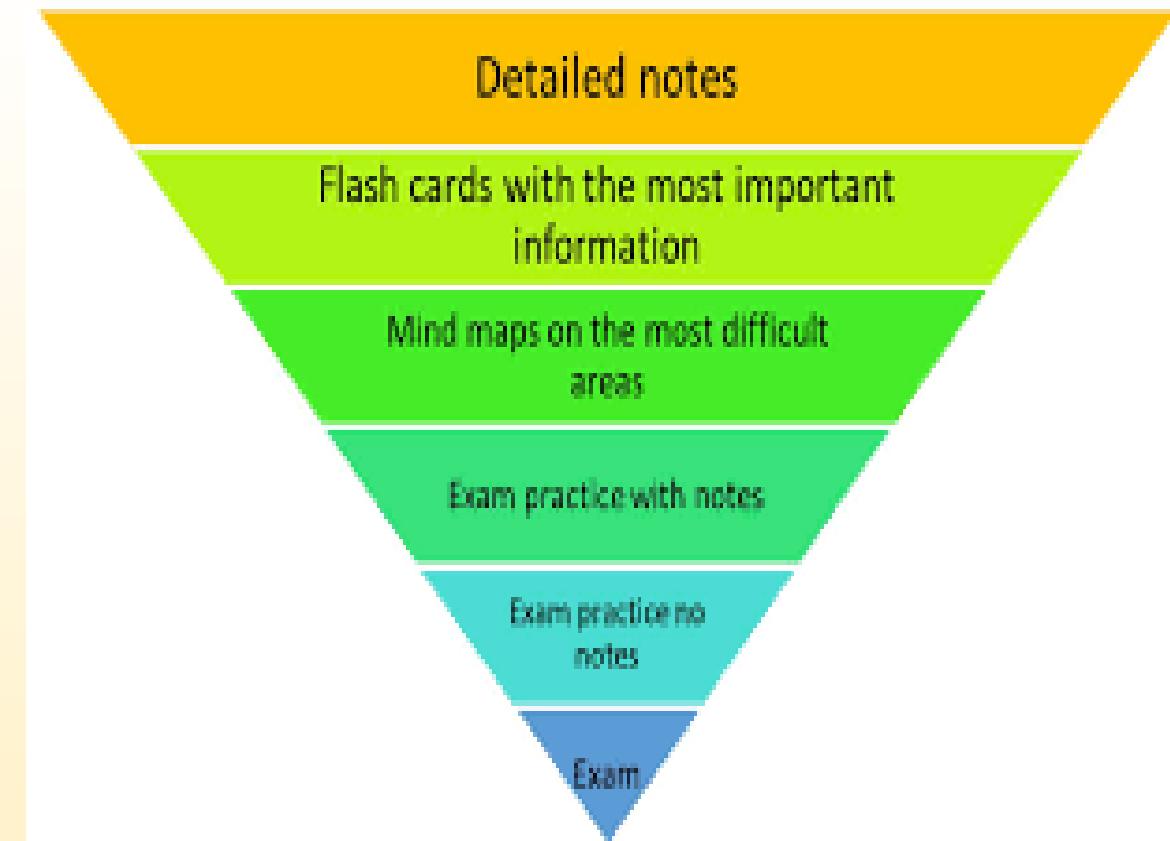

## 6 Tips for revising GCSE Science

- Alternate your techniques
- Use the past papers
- Teach someone else
- Do more of what you don't like
- Push yourself in lessons
- Take care of yourself

# Alternate your techniques

There are a variety of ways to revise and it's very easy to get overwhelmed and frustrated.

The best thing to do is to vary the techniques you use so that you don't get bored and so that you understand the content from all angles.

## Use past papers

- GCSE past papers are a goldmine of information.
- There are only so many questions that can be asked on each topic, so if you have done every past paper since 2018 then some of the same questions are bound to come up.
- You'll begin to understand the key terminology that examiners would like you to use.

So, for example, the AQA GCSE mark schemes insist that you use the word light or sunlight to describe where plants get their energy for photosynthesis, but you wouldn't get the mark for just sun!

## *Teach someone else*

Trying to teach someone else a topic exposes the parts of it you're less good at and can guide your revision accordingly.

You can teach:

- A family member
- Your peers – learn some topics between you and then teach each other

## *Do more of what you don't like*

It's easy to fall into the trap of revising the topics and subjects you like. This is gratifying because you do well on practice questions and flash cards.

It's better to spend your time on topics you find difficult. Try to make a list of these and don't fall into the trap of avoiding them.

Stay confident and trust in the process – by revising consistently throughout the year, you will see your marks improve, even if it's not immediate.

## *Push yourself in lessons*

Everything you do in lessons this year is geared towards helping you to achieve exam success.

Use this time to your best advantage so that you are improving your knowledge and understanding and practising important skills you will need for your exams.

## *Take care of yourself*

All other advice is pointless if you're not taking care of yourself.

- Get enough sleep
- Stick to a regular sleep pattern
- Keep away from electronics an hour before bedtime
- Eat healthily and stay hydrated – keep time when you're eating as relaxation time
- Take breaks

## Useful Apps

# Revision Menu

Remember to EMBRACE struggle! Everything should be from memory and independent. If you look at your notes, change colour pen...

## 5 min activities:

- Flash cards
- Try an exam question
- Create a concept mind map
- Quiz questions/23 equations
- 5 minute 6 mark question plan
- Write formulas from memory

## 30 min activities:

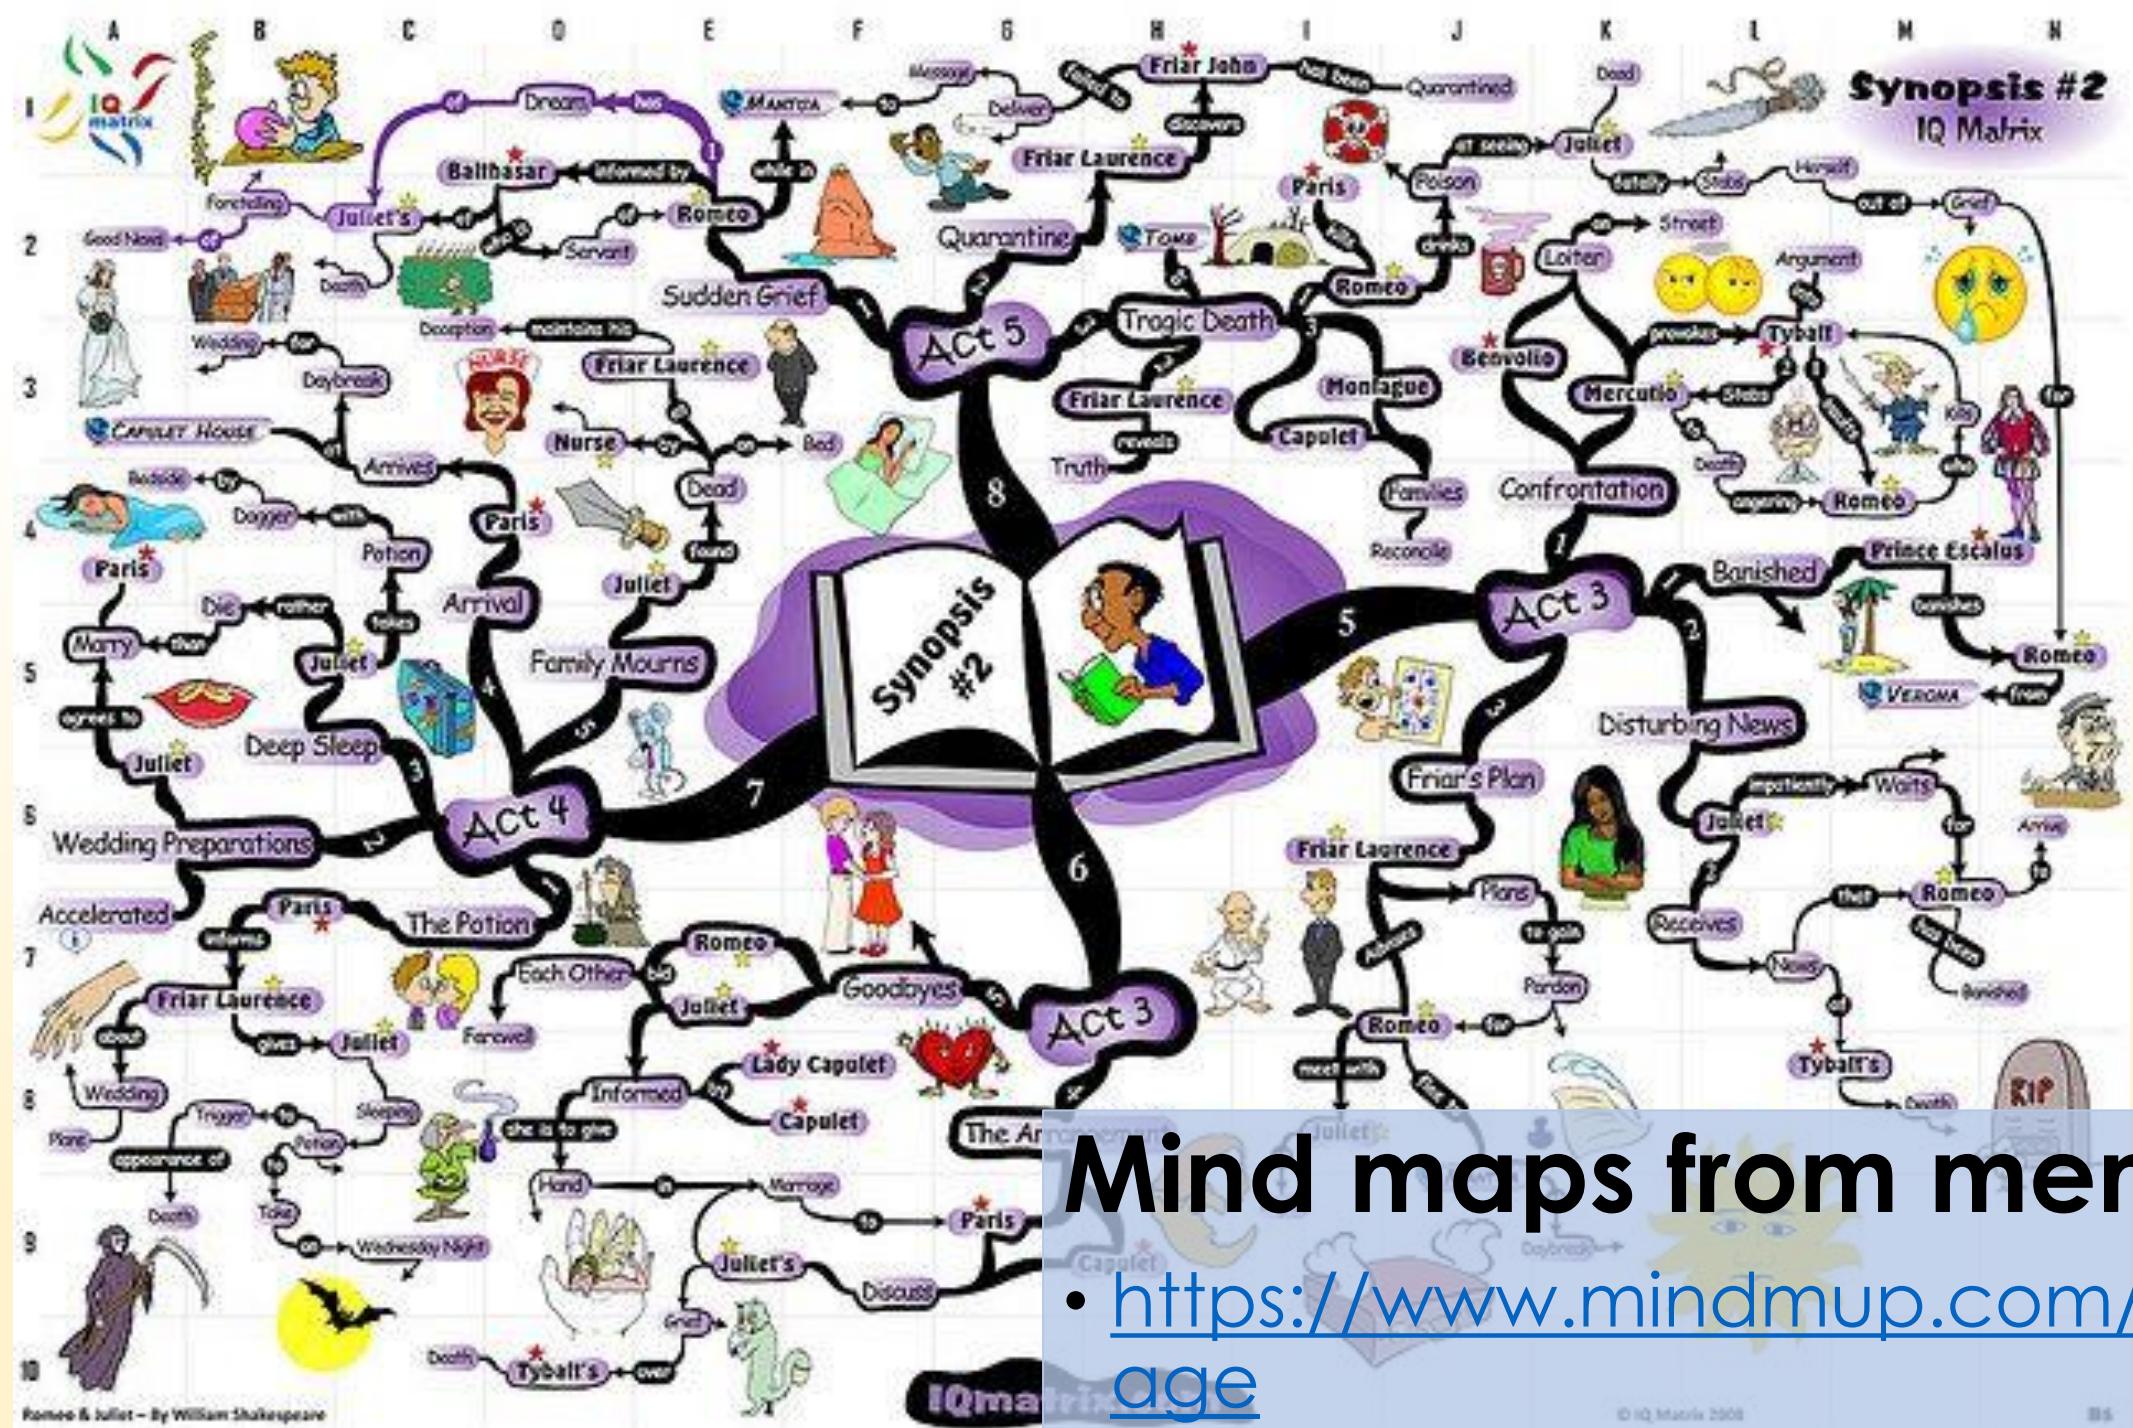

- Plan / write and self-assess an answer to a 6 mark question
- Exampro questions and self-assess
- Complete Seneca tutorial and quiz
- Create a mind map from memory, for a topic you have revised.

## 10 min activities:

- Watch GCSE revision video - links on the revision timetable
- Write a method for a Required Practical with the key terminology.
- Answer 6 quiz questions
- Test yourself using your flashcards - randomly chosen

## Resources:

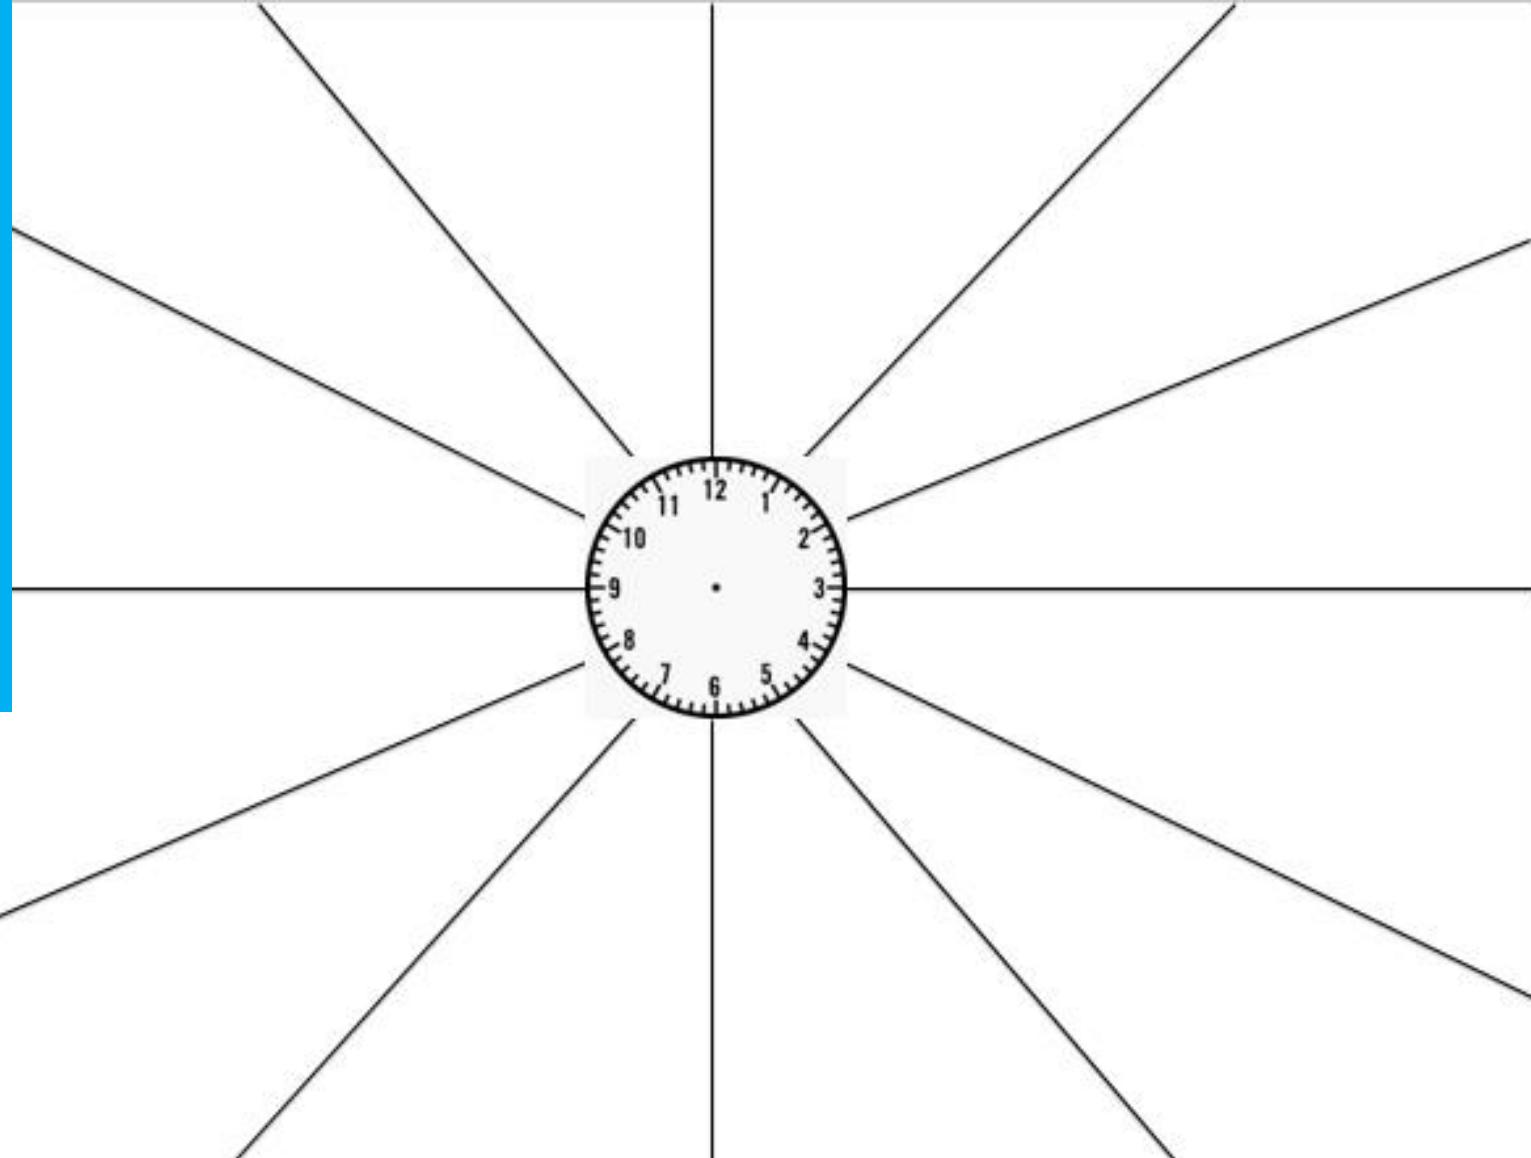

- Revision clocks - set your own time limit!
- Flash cards
- Mind maps

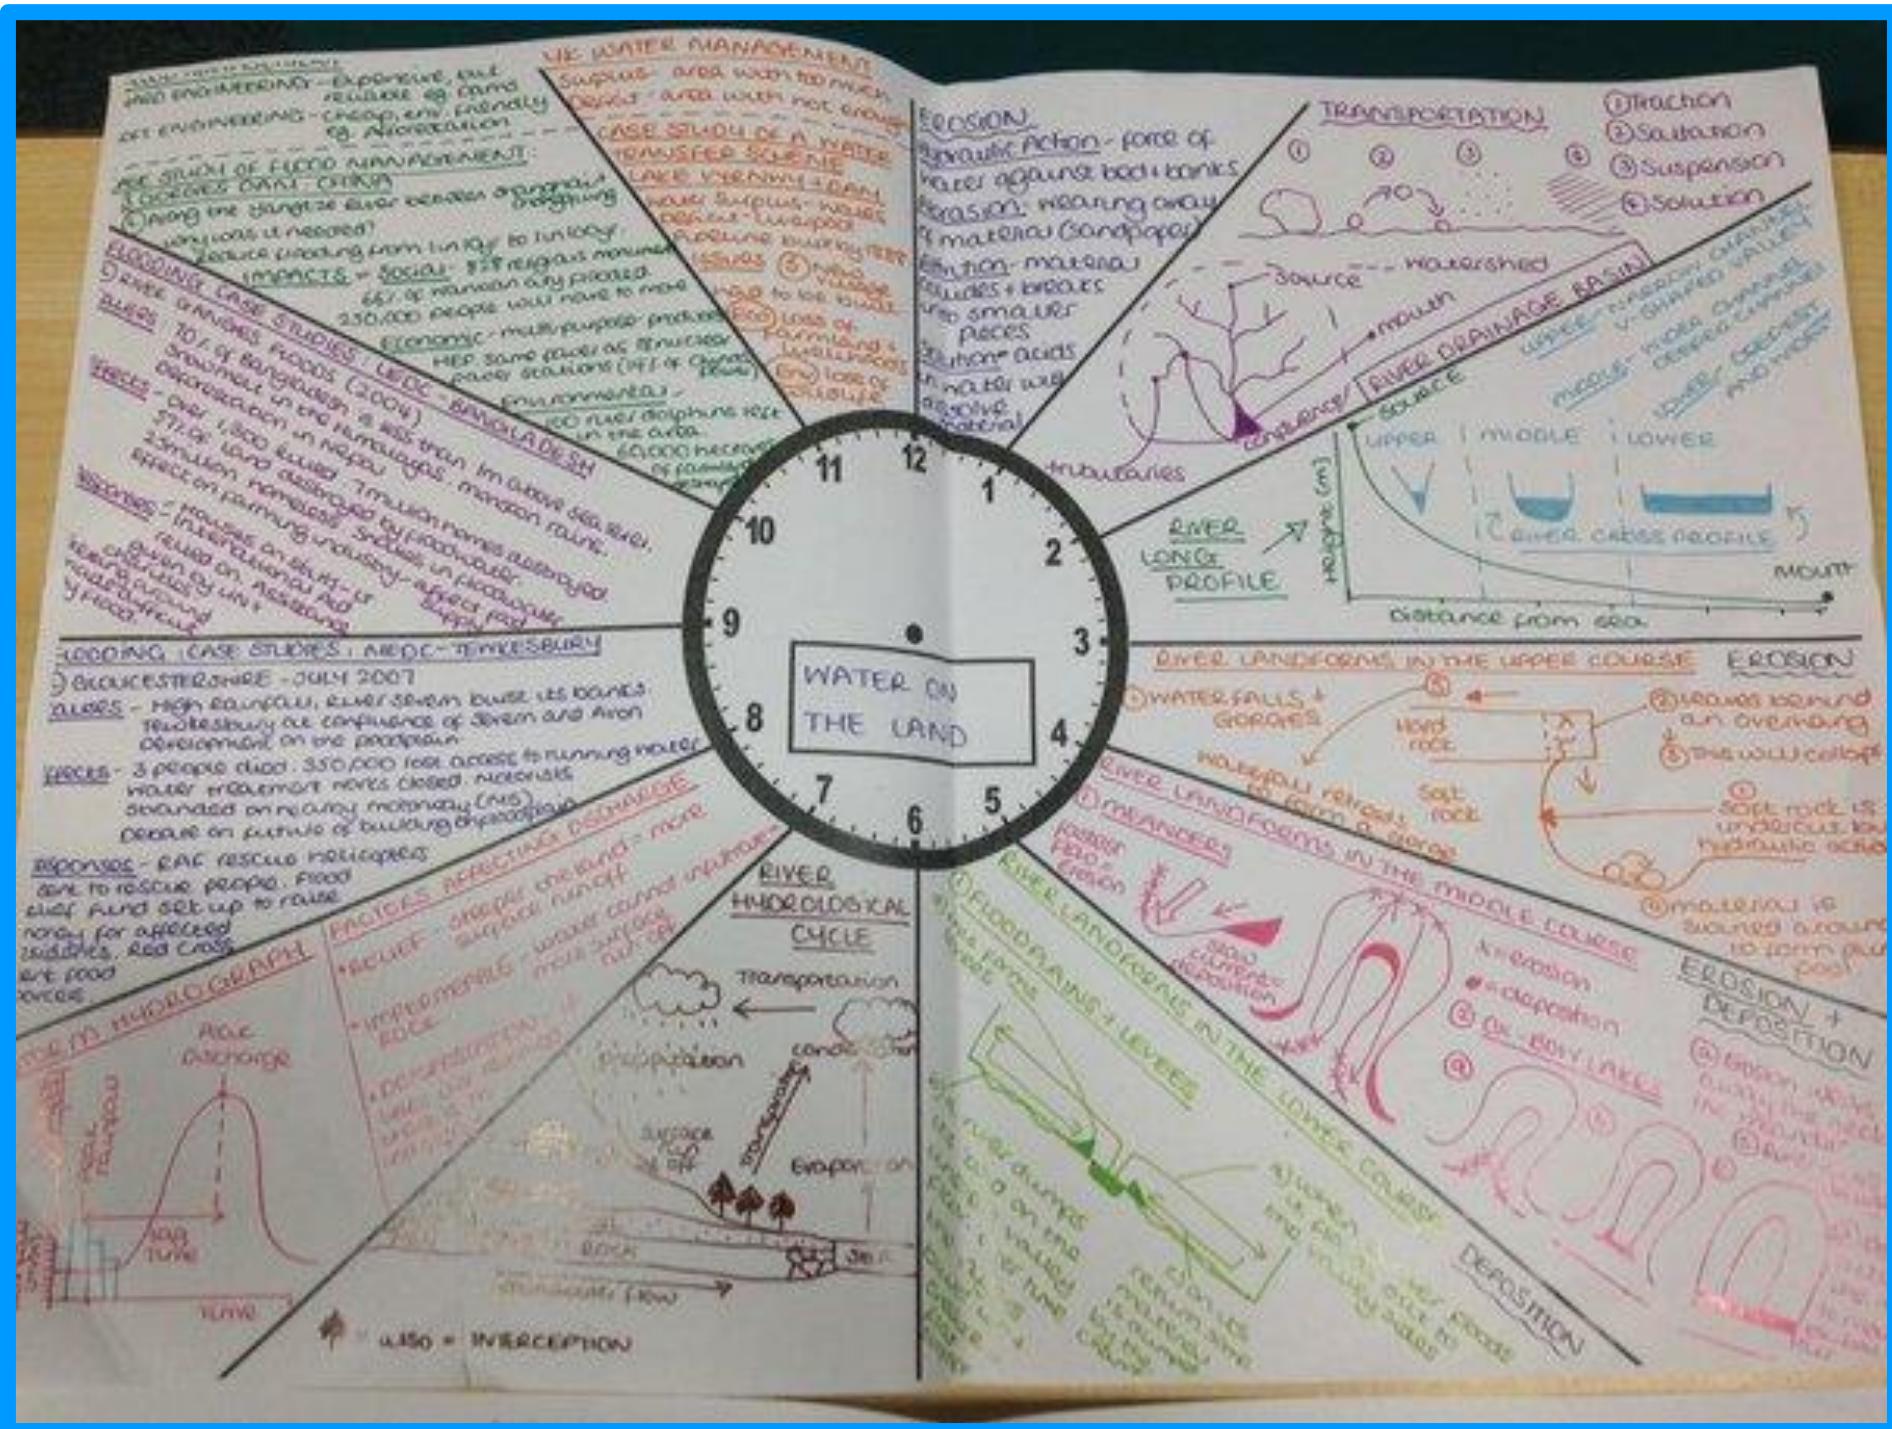

# Mind maps from memory
